Education

Dublin City University, BSc in Computer Science Sep. 2022 – May. 2026

Key modules: Object Orientated programming, DevOps, Full Stack Development, Artificial Intelligence, Introduction to Databases, Software Testing

St Patricks College Cavan Sep. 2016 – June. 2022

Leaving Certificate – 532 points

Technical Skills

Languages: Python, Java, C, JavaScript, Prolog, R, Haskell.

Operating Systems: OS, UNIX and windows.

Databases: SQL, Mongo DB, UML.

Front end development: Have experience using HTML/CSS, TypeScript, Express, React, Node, Django and bootstrap.

DevOps: Gitlab, GitHub, Shell-scripting, Git, Docker, AWS.

Relevant Work Experience

Full stack engineering intern

Boostlingo March. 2025 – August. 2025

- Contributed to the development and maintenance of SaaS-based interpreting software, working across front-end (TypeScript, React, HTML/CSS) and back-end (Java, Grails, MySQL) technologies.
- Collaborated in an agile team environment using Jira and GitHub for task management, code reviews, and integration testing.
- Participated in a company hackathon, building the frontend of an AI-powered glossary application with React and Deepgram API.

Other Work Experience

Spare Parts dealer

Tractamotors Cavan (Agri department) May. 2020 – August. 2024

- Selling spare parts of agricultural machinery to farmers and trade dealers.
- Operated cash tills, card machines, office computer, made sales, returns and exchanges.
- Booked in and managed stock on the company's computer.

- Developed excellent customer service, sales and communication skills.
- Ensured that the opening and closing procedures of the store were carried out.

Projects

Smart Blur – Automated Image Privacy Tool (Final Year Project) | Python, Flask, YOLOv8, OpenCV, HTML, CSS, JavaScript

- Developed a web-based system that automatically detects, and blurs faces and license plates in images to protect user privacy.
- Trained two YOLOv8 models for object detection and integrated them into a Flask backend with OpenCV for image processing.
- Built a simple, interactive frontend to allow users to review and adjust detected areas before applying blur.

Geosig – QR Code Security System (3rd Year Project) | Express.js, AWS (EC2, RDS, Lambda), MySQL, Android (Java), HTML/CSS

- Developed a security-focused system to prevent QR code fraud using geolocation-based verification with mobile and web components.
- Built an Android app for QR scanning with GPS validation and an admin web portal for QR code management.
- Implemented cloud-based infrastructure (AWS EC2, RDS, Lambda, API Gateway) to ensure scalability, low latency, and high availability.

Finance Tracking App (Personal Project) | Node.js, React.js, MongoDB, HTML, CSS, GitHub

- Developed a full-stack finance tracking system with API, database, frontend, and backend integration.
- Designed responsive UI with HTML/CSS and implemented transaction tracking with MongoDB.
- Configured and deployed REST APIs using Node.js and React.js for seamless data flow.

Interests/Awards & Achievements

- Have been a member of my local GAA team (Lavey, Cavan) for the past 14 years. Actively take part in fundraisers to earn money for the club.
- Member of a DCU five a side soccer team for the last four years.
- Completed the DCU Student Mentorship programme in April 2024. Own the student mentorship digital badge. Gained insight from a graduate of my course about the IT industry.
